**CONTENTS continued >>**
SCIENCE EXPRESS  
www.sciencexpress.org

DEVELOPMENTAL BIOLOGY  
Induced Pluripotent Stem Cells Generated Without Viral Integration  
M. Stadtfeld, M. Nagaya, J. Utikal, G. Weir, K. Hochedlinger  
Transient exposure of mouse fibroblast and liver cells to an adenovirus vector carrying factors that induce pluripotency generates stem cells without viral elements in the genome.  
10.1126/science.1162494

GENETICS  
Conservation and Rewiring of Functional Modules Revealed by an Epistasis Map in Fission Yeast  
A. Roguev et al.  
Comparison of genetic wiring in two types of yeast reveals that protein complexes are conserved, but the interactions between them can change radically between species.  
10.1126/science.1162609

MATERIALS SCIENCE  
Evolution of Block Copolymer Lithography to Highly Ordered Square Arrays  
The addition of hydrogen bonding units to two block copolymers leads to a template with square patterns that can be used for manufacturing integrated circuits.  
10.1126/science.1162950

PHYSICS  
Complete Characterization of Quantum-Optical Processes  
M. Lobino, D. Korystov, C. Kupchak, E. Figueroa, B. C. Sanders, A. I. Lvovsky  
A method requiring only the light from a laser as an input yields a full characterization of quantum optical processes by probing its effect on classical states.  
10.1126/science.1162086

REVIEW  
CHEMISTRY  
Assembling Materials with DNA as the Guide  
F. A. Aldaye, A. L. Palmer, H. F. Sleiman  
1795

BREVIA  
GEOPHYSICS  
Magnetic Source Separation in Earth’s Outer Core  
K. A. Hoffman and B. S. Singer  
Analysis of Earth’s magnetic field as it has changed and reversed suggests that its dipole arises from a distinct part of the outer core than that of the rest of the field.  
1800

RESEARCH ARTICLES  
MEDICINE  
Core Signaling Pathways in Human Pancreatic Cancers Revealed by Global Genomic Analyses  
S. Jones et al.  
Sequencing of DNA mutations shows that the same 12 signaling pathways are disrupted in most pancreatic tumors, suggesting these as key to tumor development.  
1801

MEDICINE  
An Integrated Genomic Analysis of Human Glioblastoma Multiforme  
D. W. Parsons et al.  
Comprehensive analysis of mutations in a brain cancer identifies previously unidentified cancer genes and a frequently mutated protein that may serve as a therapeutic marker.  
1807

PHYSICS  
Quantum Communication with Zero-Capacity Channels  
G. Smith and J. Yard  
Two quantum communication channels, each of which is so noisy that it has zero capacity to independently transmit information, can do so when used together.  
1812

CHEMISTRY  
Synthesis and Solid-State NMR Structural Characterization of 13C-Labeled Graphite Oxide  
W. Cai et al.  
Solid-state nuclear magnetic resonance study of graphite oxide made with 100 percent carbon-13 reveals a complex bonding network involving several carbon species.  
1815
Chemistry

Linear Response Breakdown in Solvation Dynamics Induced by Atomic Electron-Transfer Reactions
A. E. Bragg, M. C. Cavanagh, B. J. Schwartz

A solvent equilibrates faster around a sodium-electron ion pair formed from Na⁺ than from Na−, violating a widely used approximation for modeling solvent dynamics.

Planetary Science

Mars’ Paleomagnetic Field as the Result of a Single-Hemisphere Dynamo
S. Stanley, L. Elkins-Tanton, M. T. Zuber, E. M. Parmentier

A model of Mars’ early magnetic field with a north-south gradient in heat flow from the core yields a strong field only in the south, explaining the relic magnetism in the crust.

Psychology

Infants’ Perseverative Search Errors Are Induced by Pragmatic Misinterpretation
J. Topál, G. Gergely, Á. Miklósi, Á. Erdőhegyi, G. Csibra

Infants may make mistakes in certain tasks because of the powerful effects of social interaction with an adult, not because of brain immaturity as was previously assumed.

Biology

Antigen Recognition by Variable Lymphocyte Receptors
B. W. Han, B. R. Herrin, M. D. Cooper, I. A. Wilson

The receptor that binds antigens in jawless vertebrates differs from the immunoglobulins of jawed vertebrates and uses a variable concave surface and Carboxyl terminal for recognition.

Medicine

Disruption of the CFTR Gene Produces a Model of Cystic Fibrosis in Newborn Pigs
C. S. Rogers et al.

Newborn pigs carrying a mutated copy of the gene defective in cystic fibrosis exhibit many features of the human disease and may provide fresh insights for therapy.

Geophysics

The Structure and Dynamics of Mid-Ocean Ridge Hydrothermal Systems
D. Coumou, T. Driesner, C. A. Heinrich

A three-dimensional model shows that mid-ocean hydrothermal systems self-organize into broad warm downflows feeding narrow, pipelike hot upflows.

Neodymium-142 Evidence for Hadean Mafic Crust

An unusual isotopic anomaly in rocks along the Hudson Bay suggests that they formed 4.28 billion years ago and support early formation of a separate reservoir in Earth’s mantle.

Psychology

The Coevolution of Cultural Groups and Ingroup Favoritism
C. Efferson, R. Lalive, E. Fehr

Results of a laboratory game show that cultural groups and ingroup favoritism arise spontaneously when individuals display an external marker that predicts their actions.

Medicine

Seeding and Propagation of Untransformed Mouse Mammary Cells in the Lung
K. Podsypannia et al.

In mice, normal mammary cells can colonize the lung, suggesting that metastases might arise from displaced normal cells acquiring genetic changes that confer malignancy.

Understanding Overbidding: Using the Neural Circuitry of Reward to Design Economic Auctions
M. R. Delgado, A. Schotter, E. Y. Ozbay, E. A. Phelps

Brain areas sensitive to loss are selectively engaged during bidding in an auction, suggesting that the desire to avoid loss underlies the phenomenon of overbidding.
**RESEARCH ARTICLE: Nedd4 Controls Animal Growth by Regulating IGF-1 Signaling**

X. R. Cao, N. L. Lill, N. Boase, P. P. Shi, D. R. Croucher, H. Shan, J. Qu, E. M. Sweezer, T. Place, P. A. Kirby, R. J. Daly, S. Kumar, B. Yang

Nedd4 acts through Grb10 to enhance insulin-like growth factor signaling and control animal growth.

**PERSPECTIVE: Caspase-2—Vestigial Remnant or Master Regulator?**

C. M. Troy and E. M. Ribe

Both mitochondrial-dependent and -independent cell death pathways are mediated by caspase-2.

**PODCAST**

E. M. Adler, N. R. Gough, A. M. VanHook

Bacteria secrete factors that regulate genes that contribute to virulence.
